Homework 2

Due: Sunday 8/11/2026 23:59:00
Group submission: HW2_YOURNAME.zip

Late submission policy: Late submissions will incur a **10**% deduction from the total score for **each** day late, for a maximum of 3 days. Any submission received more than 3 days after the deadline will receive a score of 0 for the assignment.

• Submit your source code + documentation (pdf) in a zip file on LMS

• Your documentation must include the full names of all the members in your group and their contributions (0-100%). Only ONE (1) submission per group is required.

Grades will be awarded based on the following criteria:

Problem Formulation – Clarity and correctness in defining the problem and its objectives.
Originality – Creativity and originality of the proposed problem or approach.
Level of Challenge – Complexity and difficulty of the problem and solution.
Documentation – Clarity, completeness, and organization of the submitted documentation.
On-Time Submission – Submission of the homework by the specified deadline.

Your GROUP report should include a GUI simulation and a detailed documentation of the algorithms for 1 of the 2 games below.

Choose ONE (1) of the TWO (2) topics below:

Topic 1: Tic-tac-toe (7x7, 9x9, 11x11 …)

1. Backtracking
2. Alpha-beta pruning
3. MCTS
4. Compare between different methods

Topic 2: Chess

1. Alpha-beta pruning
2. MCTS
3. Compare between the 2 methods

-The end -
